

2J UNIVERSITY CLASSES OF 2026

**MITSUBISHI
ELECTRIC**

Service Seminar

This class will provide a product overview of Mitsubishi Electric M and P Series equipment; its operation; installation best practices; system start up and troubleshooting procedures. The session will also explore the technology used in the equipment and product updates made to align with A2L standards. There will be a functional overview of wiring diagrams, refrigerant cycles and the electrical flow-through of the systems. M&P Service Seminar books included in the class. Agenda bullet points available for the first 25 attendees.

Tuesday, April 28, 2026
